## Press Release

Bucharest – 09.04.2026

### **Ascendia Launches LIVRESQ Companion, an AI Assistant for Teachers, with Support from Google. First Contract to Reach Over 10,000 Teachers in Romania**

**Bucharest, April 9, 2026 – Ascendia S.A. (BVB: ASC)** is proud to announce the launch of LIVRESQ Companion, an AI-powered pedagogical assistant designed to streamline the daily workload of educators across Romania. Developed with support from Google’s AI for GovTech Accelerator, this innovative tool is already experiencing rapid adoption. Through a newly signed partnership, LIVRESQ Companion will be rolled out to over 10,000 teachers in 800 Romanian schools in the coming months.

LIVRESQ Companion provides teachers with a simple and intuitive workspace from which they can make specific requests for lesson planning, activity proposals, worksheets, assessment tools, or content adaptations based on the level of the class. Instead of fragmented steps and a heavy volume of repetitive work, teachers now have access to digital support that responds quickly and in a structured way, in line with the Romanian national curriculum. The tool is available online, by invitation only.

“With LIVRESQ Companion, we are providing a reliable support tool for teachers, one that is tailored to the Romanian school curriculum. We developed this component to address a pressing need within schools: combating bureaucracy and administrative overload. Our goal is to turn hours lost to repetitive tasks into just a few minutes of efficient work, giving teachers back the time they need for what truly matters, the act of teaching itself and connecting with their pupils.”

## **Alex Mălureanu, Co-founder and CMO of Ascendia.**

Ascendia significantly accelerated the development of LIVRESQ Companion following its selection for the prestigious **Google for Startups Growth Academy: AI for GovTech**. This exclusive program empowers innovators to build AI-driven solutions that deliver strategic impact in the public sector.

„Supporting Ascendia through our AI for GovTech program highlights Google’s commitment to fostering meaningful innovation that serves the public good. LIVRESQ Companion is an example of how artificial intelligence can support educators, reducing administrative burdens and allowing them to focus on inspiring their students. We are thrilled to see this technology reach over 10,000 Romanian teachers, demonstrating that local digital solutions can drive profound institutional change and create a lasting, positive impact on the national education system.”

**Elisabeta Moraru, Regional Director Google CEE.**

The new component integrates seamlessly into and expands the LIVRESQ ecosystem, supporting the teaching workflow. Teachers can personalize their experience by completing their teaching profile so that AI-generated responses are fully tailored to their subject, class levels, and teaching style, while also discovering and integrating resources from the LIVRESQ Digital Library.

"I'm thrilled to see the launch of LIVRESQ Companion, which combines Google's cutting-edge AI with educational expertise to help over 10,000 Romanian educators turn administrative hours into real classroom impact."

**Tim Eck, Insights Lead & AI for GovTech Mentor**

To facilitate large-scale implementation, an essential aspect of GovTech digitalization projects, LIVRESQ Companion also includes features designed for school leadership. School administrators can efficiently manage licenses, grant access to teachers, and track account statuses, turning the platform into a solution that is exceptionally easy to administer at an institutional level.

With the launch of LIVRESQ Companion, Ascendia continues to expand the LIVRESQ ecosystem with tools that bring technology closer to teachers, schools and pupils in a practical, accessible, and classroom-relevant way.

## **About Ascendia**

Ascendia delivers end-to-end digital education solutions for large and complex systems, from corporations to national and local public administrations. A member of the European Commission’s Digital Education Content (DEC) expert group and e-learning provider to the Council of Europe, the company combines data-driven strategies with modern technologies. By embedding AI into its platforms, Ascendia creates scalable solutions that strengthen institutions and generate community impact, with applications in education, cybersecurity, agriculture, energy, housing, transportation, space technologies, environment, healthcare, manufacturing, and defense.

**About LIVRESQ**

LIVRESQ is Ascendia's e-learning ecosystem, currently used by over 161,100 creators from more than 7,260 institutions and companies. LIVRESQ enables training teams to quickly produce courses, interactive lessons, and open educational resources, and then distribute them in open standards (SCORM), fully compatible with existing LMSs.
